Data

Connectivity is vital to ensure your operations run smoothly.

It is essential that your business has secure, superfast, responsive and reliable connectivity. We can provide you with the best pricing on a range of connectivity and infrastructure solutions, from traditional broadband to high-speed radio, tailored to suit your individual business needs.

- Converged voice and data networks
- High-performance radio network
- Network design and consultancy
- Super-fast connectivity
- Network infrastructure
- Data centre hosting

High Speed Connectivity

It is vital that your business has secure, superfast, responsive and reliable connectivity. Depending on your location we can offer you faster alternatives which can have a significant impact on your daily operations and potentially save you money.

- **Multiple connectivity technologies/options available**
- **Tailored to suit your specific business requirements**
- **Specialist advisors to help you find the best solution**

Network Infrastructure

We provide a flexible network environment optimised to evolve based on your changing needs and opportunities. Whether LAN or WAN to support your team or remote working solutions to aid employees on the go, we have the solution for you.

- **Tailored solutions to suit your needs**
- **SLAs safeguard your business' critical services**
- **Remote monitoring and first-line support**

EtherReach Radio Network

A breakthrough product, EtherReach offers all the speed and reliability of fibre optic connections, at lower cost and installed in as little as five days. Delivered via our high performance radio network, EtherReach can be delivered to areas where traditional connectivity is unfeasible or prohibitively expensive.

- **Five-day installation**
- **No telephone line required**
- **Dedicated line with unlimited usage**

Data Centre Hosting

We can offer you a virtual or dedicated cloud-based server environment located in our secure data centre, allowing you the flexibility to access your data from anywhere.

- **Useful for sharing resources like files and applications**
- **Data backup offers security should the worst happen**
- **Freedom to grow and evolve with your business**

The **Silver Lining** Solution

Every year, the amount of data we store and transmit grows massively. We invest in bigger hard drives and more powerful hardware, but our Internet connections are often left behind - despite being the core data thoroughfares.

We don't think anyone should be left behind as the "big data" revolution marches on. That's why we offer a wide range of connectivity options; we'll work with you to find the solution that truly suits your business' location and data demands.
