Cloud PC: Your Gateway Into Limitless Efficiency & Security

Have desktop simplicity and security while delivering business applications such as Office 365 from our central true private cloud to any device.

Welcome To Cloud PC

The ability for employees and enterprises to work remotely is increasingly important in a rapidly changing world.

Get the most out of your IT budget and increase flexibility with the high-security, hassle-free remote working solutions supported by our experienced technical professionals.

Access your software, emails, files, and Microsoft applications securely from anywhere, anytime and on any device.

Have Questions?

Call us on 0345 683 11 11, email us on info@silver-lining.com or chat with us on our website.

Cost-effective IT Support 24/7

24/7 UK-based support is available to all of your team, irrespective of where they are in the world. Save on costs with your current IT capability, whether outsourced or making in-house management easy.

Bring Your Own Device

With BYOD, end users can plug and play with proportionate security controls and monitoring of these devices so they are sufficiently secured.

Scaleable & Resilient

Adopt a scalable, cloud-based platform that offers the resiliency needed to meet change head-on with flexible deployment options across private and public clouds.

Secure Data Storage

Your business-critical data is safely stored and backed up to the cloud, with no data stored locally or able to be copied onto user devices.

Work Anytime, Anywhere, on Any Device.

Our Cloud PC allows ultimate flexibility and security, with all applications running centrally within the Cloud environment. With data stored centrally across a virtual environment, you can work from any computer, Windows, Mac, even Chromecast via our Private Cloud or over the internet.

Using a Cloud PC allows us to publish the latest software and applications directly to your desktop, removing the headaches of software management, significant purchases, and the need for specialised hardware and support. (Think of it like virtual IT).

Silver-Lining can also ensure no Ransomware occurs on all infrastructure given the current security dynamic.

What Can You Expect From Our Cloud PC Solution?

Disaster Recovery

No matter what happens, as reliable Cloud PC providers, we'll help to ensure business continuity so your customers won't notice any disruptions.

Control Your Costs

Minimise logistics and related costs of shipping hardware back and forth, reduce the cost of maintaining and supporting physical hardware as well as support BYOD to save on endpoint costs.

Reduce Your Carbon Footprint

Lower your carbon footprint, lower your emissions, and help preserve the environment for future generations without sacrificing capability.

Office 365 Access

With a Cloud PC, you can access your favourite software, productivity apps and collaborate on documents such as Office 365, all from anywhere, on any device.

Familiar Windows Environment & Work With Your Favorite Software

Google Workspace   Office 365   Microsoft Teams

zoom   aws   Windows

How It Works:

You simply need a device and a data connection to access our secure cloud platform. With these two things, you can access a network environment where you will see applications as if they were loaded onto your machines.

Hosted In The UK

Our Cloud PCs are exclusively hosted and replicated across 14 UK-based datacentres, meaning your desktop will always be available.

GDPR Compliant

Our solution is fully GDPR compliant with robust industry-leading security included as standard.

Daily Backups

Your data is regularly backed up daily across our ISO-accredited data centres with full file restore available.

Why We Do It:

Low Latency & Security

We use state-of-the-art technology to ensure fast connection speeds without sacrificing security or privacy at any point in the process.

Fault Tolerance & Resilience

Great for disaster recovery by improving centralised management of devices and ensuring that you are back online as quickly as possible if an outage occurs.

High Speed Connectivity to Anywhere

Your clients can connect at speeds up to 10 Gbps from anywhere in the world with our internet layer, reducing the likelihood of slow or unreliable internet.

Efficiency & Flexibility

Our Application Layer offers an efficient way to deploy applications faster while also allowing you to add new features as needed.

You're In Safe Hands

We are one of the largest IT and communications managed service providers, growing bigger every day. This is because our solutions are underpinned by the ideal combination of innovation, assurance and experience.

We are proud to present a list of our certifications that each of the Silver Lining family upholds and works to. They are a testament to our team's hard work and dedication to their work and our values as a business.
